

Parent Curriculum Information Sheet **Summer Term 2024-25**

Year 5

Mr Burnett

As readers and writers, the children will continue reading to learn new information and for pleasure through accessing a wide range of different text types. They will develop their writing in a range of styles to create varying effects for the reader.

As scientists, children will learn about living things and their habitats, including how plants and animals reproduce, as well as the main stages of animal life cycles of mammals, reptiles, insects, birds and amphibians.

As theologians (R.E), children will explore Christianity further by exploring the ways Jesus behaved and how his influence affects the daily lives of Christians in the modern world.

As mathematicians, the children will continue to refine their calculation strategies, including the use of negative numbers and converting units of measure. They will also learn to recognise, measure and draw angles, deepen their understanding of decimals and learn to describe the position of objects in the four quadrants.

As geographers, children will learn about a contrasting locality – South America. They will focus on 'population', learning about where most people live and why, as well as exploring issues associated with high and low populations and the reasons for this.

As historians, children will learn about the Industrial Revolution and how the introduction of factories and steam-powered innovations impacted the people of Britain between 1750 and the 1900s.

As dancers, children will create circus-themed movements using both apparatus and equipment, working in a small group or a pair to create their own dance routine.

As team players, children will learn to develop the skills required to be successful in both tennis and rounders. Children will also develop their understanding of different tactics and their sense of fair play when competing against others.

As athletes, children will learn how to become more successful in a range of running, jumping and throwing events, focusing on refining their technique and trialling different ways of doing things to beat their own personal goals.

As citizens (PSHE), children will learn about the changes their body may go through during puberty and complete an enterprise project.

As computer scientists, children will learn how to use vectors to make digital drawings. Additionally, they will learn how to program a multiple-choice quiz.

As artists, children will learn how to use printing to make repeating patterns. These will be inspired by repeating patterns found by observing and drawing a range of plant-life.

As technologists, children will learn about how to make a sturdy structure and will design and make a polytunnel using the skills that they have learnt.

As musicians, children will learn about the hip-hop and soul genres. As part of this, they will learn to accompany songs with instruments and compose their own music.

- Please ensure that your child has their reading book and diary in school every day.
- Please ensure that your child has their PE kit in school every day.

Thank you so much for your continued support and if you have any questions, please feel free to contact me.
